Myself :

Hello, My name is Ashwini Bahadur. I am 25 years years old and I am from Ranchi, the summer capital of Jharkhand. This capital city of Jharkhand has some of the most scenic cityscapes in India. Popularly referred to as the City of Waterfalls, Ranchi is a beautiful destination full of natural and cultural wonders, with opportunities for trekking through bamboo covered topography and feasting on regional delicacies like 'Golgappas'.

My family comprises of 5 members. I have two elder sisters, The eldest is currently working in TCS and the later one is currently preparing for competetive exams. My father is a retired serviceman from TATA STEEL. My mother is a sweet homemaker.

I completed my Matriculation and Intermediate from HOLY CROSS school, located near my home. I have done my Graduation from C.V RAMAN COLLEGE OF ENGINEERING, Bhubaneswar, Odisha. I completed my Graduation in 2019, and started preparing for Government competetive Exams. But due to severe health issues I was unable to study well. Major medicines were consumed by me during those days so I was unable to grop the race. After a year of completion of my Medications, I decided to leave the Rush field. Under many suggestions and good guidance from my elder sister, I opted to enter in the IT field because I need a job soon.

Then I got to know about Edyoda IT Learning platform. I researched very well about it. I gave the Admission test and got admitted in Edyoda. Now I am currently pursuing Java full-stack developer program at Edyoda. In my opinion it is among the good

bootcamps of India. The Mentorship, course structure and everything is well enough. I am working hard, doing my best and positively looking forward for a great career through Edyoda. Thank you !
